

Electronic

Circuit Boards

RAM provides electronic solutions for OEM customers who require printed circuit boards in their product design.

Our comprehensive facility is equipped to provide engineering, design, and manufacturing expertise in building printed circuit board assemblies for your application.

Our leading-edge manufacturing, assembly, and testing procedures enable us to produce consistent, high-quality products in accordance with ANSI/IPC specifications.

- Wave Soldering
- Aqueous Cleaning
- ANSI/IPC Compliant
- Ionic Contamination Monitoring Equipment
- Surface Mount
- Thru Hole

Quality Control

Assembly procedures are in compliance with IPC recommendations and conform to all customer requirements. Production testing with automatic optical inspection equipment and ionographs insures that all circuit board cleaning processes are within the quality control specification.
